

Dunbarton Energy Committee Meeting Minutes, June 16, 2014

Members Present: Bob Ray, Wayne Bracey, Ted Vallieres, George Holt, Lee Richmond, John Stevens
Meeting opened at 7:05 PM

1. Public Comment

None

2. Mar. 17, 2013 Minutes approval

Approved (no meetings held Apr. and May)

3. Project reports:

* Neighbors Warming Neighbors program:

John reported on two more thermal imaging home visits.

Members agreed that we need to find better ways of publicizing the NWN Program, add to website and in the press.

We need to arrange with two previous clients to complete insulation installation. (pipes and water heater blanket)

*Town Solar installation

We need to get better information on utility rules, metering and inverter needs. Will consult with one of our members and

maybe re-contact the local solar installer who looked at a possible installation at the Town Garage.

Will look to see whether we can offer this option to guide both the Town and residents through the process.

This is a new direction for DEC to become engaged in.

*Website

We need to update the DEC Website mostly of content such as NWN, Solar, highlighting our accomplishments and more.

*Facebook

We currently have two pages, one private and one public. Members decided to discontinue the private page and focus on the public page.

Meeting adjourned 8:14 PM

Respectfully submitted: John Stevens

Next meeting Monday, July 21, 2014.
